

PREFACE

We are pleased to present the proceedings of the 2023 International Conference on Data Intelligence, Knowledge Engineering and Applications (DIKEA 2023), held in Hong Kong. As the inaugural event of this conference series, DIKEA 2023 provided a vital platform for researchers and practitioners to explore the intersection of data intelligence, knowledge engineering, and real-world applications.

The papers included in this volume were selected after a rigorous peer-review process. They cover a wide spectrum of topics, including empirical research, theoretical frameworks, and case studies that address the evolving challenges in data-driven decision making, knowledge representation, and intelligent systems. These contributions reflect the latest trends and offer practical solutions in the fields of data intelligence and knowledge engineering. We express our sincere gratitude to the authors for their contributions and to the Technical Program Committee for their professional expertise in ensuring the quality of this publication. We hope these proceedings will inspire further research and cross-disciplinary collaboration.
