

**2024 2nd International Conference on
Data Science and Intelligent
Engineering Systems
(ICDIES 2024)**

PREFACE

We are pleased to present the proceedings of the 2nd International Conference on Data Science and Intelligent Engineering Systems (ICDIES 2024), held in Liverpool, United Kingdom. This conference provides a vital platform for researchers and practitioners to explore the intersection of data science and intelligent engineering systems. The papers included in this volume were selected after a rigorous peer-review process. They cover a wide spectrum of topics, including empirical research, theoretical frameworks, and case studies that address the evolving challenges in the global landscape. These contributions reflect the latest trends and offer practical solutions in the fields of data science and intelligent engineering systems.

We express our sincere gratitude to the authors for their contributions and to the Technical Program Committee for their professional expertise in ensuring the quality of this publication. We hope these proceedings will inspire further research and cross-disciplinary collaboration.

The Organizing Committee of ICDIES 2024

CONTENTS

Transfer Learning Strategies for Adapting Pre-Trained Models to Domain-Specific Intelligent Engineering Tasks	
Yuxuan Chen	1
Bayesian Optimization Frameworks for Hyperparameter Tuning in Data-Driven Control Systems	
Alexander J. Reed.....	13
Self-Supervised Representation Learning from Sensor Data in Cyber-Physical Intelligent Systems	
Xiaoming Li	26
Causal Discovery and Inference Methods for Data-Driven Decision Making in Engineering Management	
Isabella K. Vargas.....	41
Adversarial Robustness Enhancement in Deep Learning Models for Safety-Critical Intelligent Infrastructure	
Jingyi Wang.....	53
Knowledge Graph Construction and Reasoning for Intelligent Knowledge Management in Engineering Domains	
Daniel P. Hayes	67
Multi-Agent Reinforcement Learning for Collaborative Optimization in Distributed Engineering Systems	
Zihan Liu.....	78
Uncertainty Quantification Techniques in Probabilistic Data Science Models for Engineering Reliability Analysis	
Charlotte E. Brooks	90
Automated Machine Learning Pipelines for Rapid Development of Intelligent Engineering Applications	
Wenhao Zhang.....	104
Deep Generative Models for Automated Synthesis and Optimization of Engineering Designs	
Lucas M. Rivera	114
Real-Time Streaming Data Analytics for Adaptive Control in Intelligent Transportation Networks	
Yifan Zhao.....	127
Swarm Intelligence Algorithms Enhanced by Data Science for Collective Decision-Making in Robotic Swarms	
Amelia R. Foster.....	149

Structural Health Monitoring Using Advanced Data Science and Machine Learning on Sensor Networks Ruoxi Sun.....	164
Blockchain-Enabled Secure Data Sharing Frameworks for Collaborative Intelligent Engineering Projects Ethan J. Cole	175
Human-in-the-Loop AI Systems for Enhanced Decision Support in Complex Engineering Environments Haochen Zhou	188
Meta-Learning Approaches for Fast Adaptation of Intelligent Models Across Engineering Domains Victoria S. Lang.....	202
Graph Convolutional Networks for Spatiotemporal Forecasting in Smart City Engineering Systems Qianyu Wu.....	213
Physics-Constrained Deep Learning for Accurate Simulation of Engineering Processes and Phenomena Caleb D. Ingram	228
Federated Transfer Learning for Privacy-Preserving Model Adaptation in Cross-Organizational Engineering Data Leixin Zheng	239
Explainable Reinforcement Learning for Interpretable Policy Learning in Autonomous Intelligent Systems Nora E. Patton	252
